

Practical Mathematics Volume 3 Being the Essentials of Arithmetic, Geometry, Algebra and Trigonometry

By Claude Irwin Palmer

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: . . . Fractions can be added or subtracted as in arithmetic, by first reducing them to fractions having a common denominator, and then adding or subtracting the numerators. The result should then be reduced to its lowest terms. $n \cdot n \cdot i \cdot 1, x \cdot a, a^2 \cdot z^2$ Example 1. --Find the sum of, -and-5, , a--x a x a--x $a^2 \cdot z^2 \cdot a^2 \cdot z^3$ Adding the numerators, the sum of the fractions $a^2 \cdot z^2 \cdot (a^2 \cdot z^2) \cdot a^3 \cdot z^3$ Subtracting the numerator of the second fraction from z^2 the numerator of the first, the result is $5 \cdot z^2$ MULTIPLICATION AND DIVISION OF FRACTIONS 68. Multiplication of fractions. --As in arithmetic, the product of two or more fractions is the product of their numerators divided by the product of their denominators. If we first cancel all factors common to both numerator and denominator, the result will be in its lowest terms when the multiplying is done. V...
