By -

Springer. Paperback. Condition: New. 471 pages. Dimensions: 9.3in. x 6.1in. x 1.0in. This volume contains the collected contributions of three conferences, AISC2010, Calculemus 2010 and MKM 2010. AISC 2010 was the 10th International Conference on Artificial Intelligence and Symbolic Computation. Its area of concern is the use of AI techniques within symbolic computation as well as the application of symbolic computation to AI problem solving. Calculemus 2010 was the 17th Symposium on the Integration of Symbolic Computation and Mechanised Reasoning, dedicated to the combination of computer algebra systems and automated deduction systems. MKM 2010 was the 9th International Conference on Mathematical Knowledge Management, an emerging interdisciplinary field of research in the intersection of mathematics, computer science, library science, and scientific publishing. All three conferences are thus concerned with providing intelligent computer mathematics. Although the conferences have separate communities and separate foci, there is a significant overlap of interest in building systems for intelligent computer mathematics. As in 2008 and 2009, the three events were colocated. In 2010 this was at the Conservatoire National des Arts et Métiers (CNAM), Paris, France, under the umbrella of the Conference on Intelligent Computer Mathematics (CICM2010), organized by Renaud Rioboo and Laurence Rideau. This collocation is intended to counteract the tendency towards fragmentation of communities working on different aspects of various independent branches of our general field; traditional branches (e...
